

AAD(CST306) IMP QUESTIONS

MODULE 1

1. ☐ Methods to solve recurrence eqn(Three methods)- Essay
2. Asymptotic Notations
3. ☐ Best case,Worst Case,Average case
4. ☐ Time complexity,space complexity
5. ☐ Analysis of algo(learn from last 5 year qp of DAA)

MODULE 2

Essay

1. ☐ Avl tree and its notation and eg, rotation
2. ☐ BFS -algo, analysis, eg.
3. ☐ DFS-algo, analysis, eg.
4. ☐ Strongly connected components
5. ☐ Topological sorting

MODULE 3

1. Design methods- control abstraction
2. ☒ Divide and conquer-control abstraction
3. ☐ Strassen Matrix
4. ☐ two way merge sort
5. ☒ greedy approach
6. ☐ Fractional knapsack problem-theory-eg
7. ☐ minimum cost spanning tree- kruskal's algo- analysis-eg
8. ☐ single source shortest path algo-Dijkstras algo-analysis-eg

MODULE 4

1. Design method- control abstraction
2. Optimality principle
3. Dynamic programming
4. ☐ matrix chain multiplication-algo-analysis-eg
5. ☐ floyd warshall algo-analysis-eg
6. ☐ backtracking--n queen problem-state space tree-terminologies
7. ☐ travelling salesman problem-just attend to get marks

MODULE 5

1. ☐ Randomized quick sort
2. ☐ P,NP,NPC
3. ☐ approximation algorithm
